

BUSINESS PROCESS AUTOMATION

Cut out manual busywork and connect your systems – live in weeks, not years

We automate procurement, document flow, sales, warehousing and reporting, and connect ERP, CRM and marketplaces into one loop with roles, security and an SLA – enterprise-grade, at a fraction of the usual time and cost.

16×

faster than classic integrators

–70%

manual work and double entry

3-6 mo

typical payback on a rollout

99.9%

system uptime under load

WHAT WE AUTOMATE

The key processes of a large company, end to end

From procurement to executive dashboards – we automate what today runs on spreadsheets, email and manual control. Proven on real platforms we built and still run: NeuroSNAB (supply and procurement) and ZaPlan (project management and quality control).

01

Procurement and supply

Requests, tenders, offers, deals, delivery and price control in a single loop, with a full audit trail.

02

Document flow and approvals

Electronic requests, approval routes, contracts, certificates and estimates instead of email and paper.

03

CRM and sales

One pipeline, tasks, deal stages and manager permissions. The client and full history in one place.

04

Warehouse and logistics

Stock tracking, warehouses, item movement and deliveries, synced with supply and sales – no manual reconciliation.

05

Reporting and dashboards

Live metrics for executives and CIOs: money, deadlines, workload and bottlenecks, in real time.

06

Integrations and assistant bots

ERP, CRM, marketplaces and internal systems connected; bots for alerts, requests and routine operations.

HONEST COMPARISON

Roboweb vs. a classic integrator or going in-house

CRITERION	ROBOWEB	INTEGRATOR / IN-HOUSE
Rollout time	Weeks – first working result at stage one	Months or years, result only at the very end
Cost	2-3× lower, with a fixed quote agreed upfront	Expensive, with open-ended, creeping budgets
Changes and growth	Changed and scaled fast on the AI pipeline	Every tweak: a new contract and a long queue
Support and SLA	One team, one contract, guaranteed SLA	Contractor chains or overloaded in-house IT

PACKAGES AND PRICING

Fixed quotes, agreed before the rollout starts

Each figure is a starting price for a complete, launch-ready delivery: analysis, build, integrations, data migration and handover of the source code. The exact number is confirmed after a short audit and locked into the contract.

PACKAGE	TIMELINE	PRICE
Integrations & automation Connect CRM, ERP, payments, warehouses via API	from 2 days	FROM \$1,335 AED 4,900
Telegram / WhatsApp assistant bot Requests, alerts, approvals and payments in messengers	1-2 days	FROM \$790 AED 2,900
Marketplace automation Listings, prices and stock on Amazon.ae / Noon, ERP sync	from 3 days	FROM \$2,150 AED 7,900
AI integration AI assistant on your data, auto-handling of docs and chats	from 3 days	FROM \$4,060 AED 14,900
Internal system / SaaS platform MOST POPULAR Procurement, approvals, dashboards, roles and permissions	from 10 days	FROM \$8,145 AED 29,900
Mobile app for field teams iOS + Android, push, photo reports, backend integration	from 2 weeks	FROM \$9,505 AED 34,900
Support & development under SLA Guaranteed response time, monitoring, new processes	monthly	FROM \$327/mo AED 1,200 / month

All prices are indicative starting points and are fixed in the contract before work begins – no hourly billing, no open-ended integrator budgets. AED figures are shown at the fixed rate of 1 USD = 3.6725 AED. Larger rollouts are quoted per block, so you pay for a concrete result at each stage.

HOW A ROLLOUT UNFOLDS

From audit to a working system, step by step

01

Audit and roadmap

We map your processes, find the bottlenecks and calculate payback. Output: a plan, timeline and a fixed quote.

1-3 days

02

Design and integrations

We design the logic, roles, permissions and security, then plan the links to ERP, CRM and marketplaces.

3-7 days

03

Build on the pipeline

We assemble the system from proven modules and adapt it to you, showing a working result from block one.

1-3 weeks

04

Launch and SLA support

We migrate the data, train your team and go live, then support and grow the system under contract.

days + SLA

We'll calculate the ROI of your automation – free

Describe the processes eating up your time and money and you'll get an automation map, timelines and a fixed quote within 1-2 days. No obligations, no fluff: you see exactly what, at what cost and with what return.
