

TURNKEY CUSTOM DEVELOPMENT

Websites, stores and apps – delivered in **days**, not months

We build custom websites, online stores, web and mobile apps, integrations and bots. Studio-grade quality, the speed of our own AI pipeline and a price 2-3× lower. Custom-built, never a template.

16×

faster than typical studios

2-3×

lower price, fixed before we start

2 days

SERVICES AND PRICING

Fixed prices, agreed before the first line of code

Each figure is a starting price for a complete, launch-ready delivery: design, development, integrations and handover of the source code. The exact number is confirmed after a short brief and locked into the contract.

SERVICE	TIMELINE	PRICE
Landing page One-page site for a single goal, design, forms, analytics	2 days	FROM \$1,335 AED 4,900
Corporate website MOST POPULAR 6-8 pages, case studies, blog, SEO base, CRM link	3-4 days	FROM \$2,425 AED 8,900
Online store Catalog, cart, UAE payments, delivery, admin panel	from 5 days	FROM \$4,060 AED 14,900
Web app / SaaS Client portal, dashboards, roles, database and API	from 10 days	FROM \$8,145 AED 29,900
Mobile app iOS + Android from one codebase, push, payments	from 2 weeks	FROM \$9,505 AED 34,900
AI integration AI assistant on your data, auto-handling of leads	from 3 days	FROM \$4,060 AED 14,900
Integrations & automation CRM, ERP, payments, warehouses – API data exchange	from 2 days	FROM \$1,335 AED 4,900
Telegram / WhatsApp bot Lead, sales or support bot, CRM link, in-bot payments	1-2 days	FROM \$790 AED 2,900
Website redesign New design on your content, responsive rebuild, speed-up	2-3 days	FROM \$1,335 AED 4,900
Ongoing support & growth Fixes, content, new sections, monitoring, backups	monthly	FROM \$327/mo AED 1,200 / month

All prices are indicative starting points and are fixed in the contract before work begins – no hourly billing, no open-ended budgets. AED figures are shown at the fixed rate of 1 USD = 3.6725 AED. Payment: 50% to start, 50% on delivery.

HOW WE WORK

Studio-grade quality at AI-pipeline speed

We don't cut corners to be faster and cheaper. The speed comes from technology: our own AI pipeline and library of proven modules handle the routine, while a real team owns the architecture, design and outcome.

01

We dig into the goal, not the spec

We start by defining what the project must deliver – leads, sales, automation – and agree the structure and prototype before a single line of code is written.

02

The AI pipeline handles the routine

Layout, standard screens, the integration framework and the admin panel are assembled from proven modules. What takes studios weeks takes us hours.

03

People own the quality

Developers and designers review every screen and refine the logic and details. AI speeds things up, but the final code and quality are held by the team.

04

We launch and stay in touch

You get the finished project with source code, access and documentation. We help with publishing and make changes fast – no months of waiting.

THE PROJECT JOURNEY

From first call to launch in a matter of days

01

Request and estimate

We discuss the task, goals and budget, then give a concrete estimate and lock it in.

1 day

02

Prototype and design

Structure and design around your brand. You see the future product before development.

1-3 days

03

Pipeline development

The pipeline assembles the framework; the team refines logic, integrations and details.

2-14 days

04

Launch and support

We publish, hand over code and access, train your team and stay on for changes.

1 day

ALWAYS INCLUDED

What every price above already covers

- ✓ Custom design for your brand – never a template
- ✓ Full source code and repository access, yours to keep
- ✓ Launch on your domain with SSL and access handover
- ✓ English-speaking team, communication in your time zone
- ✓ Responsive build for phone, tablet and desktop
- ✓ Analytics, Open Graph and a basic SEO setup
- ✓ Two rounds of revisions inside the agreed scope
- ✓ Free bug fixes for the first 7 days after launch

Let's put a number on your project – free

Describe your task and you'll get a concrete estimate of timeline and budget within the day: a fixed price before we start, the first prototype this week, and no strings attached.
